Subject: RE: Class VI Permit Follow-Up

Hi Andrew, I appreciate you trying to ensure that everything is in order. That will certainly be best for us and for you as an applicant as well. Unfortunately I do not have any suggestions/recommendations that I can provide. There is not a lot of history with Class VI applications here in Region 9 and they are a fairly unique undertaking.

Sorry I can't be of more help.
David

Subject: Class VI Permit Follow-Up

Hey David,

Hope all is well. I had a great discussion with Justin Ong from CalNRA the other day, he mentioned you gave him my contact, I appreciate you doing that. I like the idea of everyone teaming up to advance the ball on CCS.

I'm reaching out regarding the Class VI application for my project at Salt Creek (the same project we presented to your team several months ago). We are in the home stretch on several submission items and the associated narrative, and I'm in the process of hiring a permitting specialist for a final check and facilitation of the final submission. I was wondering if there are any permitting experts EPA Region 9 has worked with that you can recommend? The goal is to hire an expert that can review the package before submitting, so that we can make the process as easy as possible on your team.

I would appreciate any feedback, thanks for your time
